

## Modified IEEE Style

### 1. References

As part of the production system for *Bandung Creative Movement: Conference Series*, online versions of all reference lists will, wherever possible, be linked electronically using CrossRef. Consequently, it is *vitaly* important for all the references to be accurate and to be carefully formatted using the guidelines below, enabling your paper to be available online with the minimum of delay.

A complete reference should provide the reader with enough information to locate the article concerned, whether published in print or electronic form, and should, depending on the type of reference, consist of:

- name(s) and initials;
- date published;
- title of journal, book or other publication;
- titles of journal articles may also be included (optional, follow IEEE style);
- volume number;
- editors, if any;
- town of publication and publisher in parentheses for *books*;
- the page numbers.

For *Bandung Creative Movement: Conference Series*, please use numerical system where references are numbered sequentially throughout the text. The numbers occur within square brackets, like this [2] on the cited text and as a numbered list on the references, one number can be used to designate several references. The reference list gives the references in numerical, not alphabetical, order.

### Points to note

- The authors should be in the form of the initials with periods after the initials followed by surname (with only the first letter capitalized). Authors should be separated by a comma.
- The journal title is in normal type. If a journal has several parts denoted by different letters/numbers the part letter/numbers should be inserted after the journal volume number in Normal in brackets type, e.g. Phys. Rev. **12** (A)
- Both the initial and final page numbers should be given where possible. The final page number should be in the shortest possible form and separated from the initial page number by an en rule ‘–’, e.g. 1203–14, i.e. the numbers ‘12’ are not repeated.
- References should use the forms shown in Table 3 in the final reference list..

**Table 1.** Font styles for a reference.

Element	Style
Authors	Normal Initials followed by last name
Journal title	Normal Abbreviated
Book title, Proceedings title	Italic
Volume number	Bold
Page number	Normal
Year	Normal In brackets

### 1.2. Reference lists

Up to ten authors may be given in a particular reference; where there are more than ten only the first should be given followed by *et al.* Abbreviations of the names of periodicals used by BCM conference are usually the same as those given in British Standard BS 4148: 1985. If an author is unsure of an abbreviation it is best to leave the title in full. The terms *loc. cit.* and *ibid* should not be used.

Unpublished conferences and reports should generally not be included in the reference list and articles in the course of publication should be entered only if the journal of publication is known. A thesis submitted for a higher degree may be included in the reference list if it has not been superseded by a published paper and is available through a library; sufficient information should be given for it to be traced readily.
